

Environmental Policy

Avingtrans is committed to protecting the environment and ensuring that our operations are conducted in a sustainable manner. We recognize the impact that our activities can have on the environment and are committed to minimizing any negative effects.

Our Environmental Policy is based on the following principles:

1. Compliance with Laws and Regulations

We will comply with all relevant environmental laws and regulations in the countries where we operate. We will also strive to exceed these requirements where feasible and implement best practices to minimize our environmental impact.

2. Product development: Renewables and Cleaner Technologies

We are committed to developing cleaner technologies with a specific emphasis on nuclear and medical technologies. Our aim is to contribute to the development of safe, efficient, and sustainable solutions that can help address the customers' needs while minimizing environmental impact. We will invest in research, innovation, and responsible development practices to achieve this goal.

3. Energy Efficiency

We will prioritize energy efficiency in our operations by promoting the use of renewable energy sources and implementing energy-efficient practices in our facilities and operations.

4. Continuous Improvement

We will continuously monitor and assess our environmental performance and strive to improve our practices and processes over time. We will also engage with stakeholders to seek feedback and input on our environmental initiatives.

5. Communication and Engagement

We will communicate our environmental policy to all employees, stakeholders, and the public. We will also engage with stakeholders to promote sustainable practices and seek feedback on our environmental performance.

We are committed to ensuring that our operations are conducted in an environmentally responsible manner and will continue to seek ways to minimize our environmental impact.
